

BLINK PAY

Direct Bank-to-Bank Payments for Everyone

The Cost of Inaccessibility

3.5% +

Standard Card Fees

Most businesses are stuck between two bad options: expensive card machines with monthly rentals, or high-fee mobile readers.

48hrs+

Settlement Delay

Traditional POS systems are **hardware-locked**. Small businesses and informal traders are penalized for wanting to go digital, forcing them to remain cash-heavy, vulnerable to crime, and disconnected from financial growth.

Direct Rails. Instant Power.

Blink Pay is a software-only Direct Payment Rail utilizing Instant EFT and PayShap infrastructure.

 **Zero Friction:** No hardware rentals. Accept payments in minutes.

 **1% Flat Fee:** Market-disrupting transparent pricing.

 **Instant Settlement:** Liquidity in seconds.

Ethical & Shariah-Aligned

Our model is strictly **Ujrah** (fee-for-service). We avoid interest-based debt and promote fair, direct exchange without hidden costs.

The Competitive Landscape

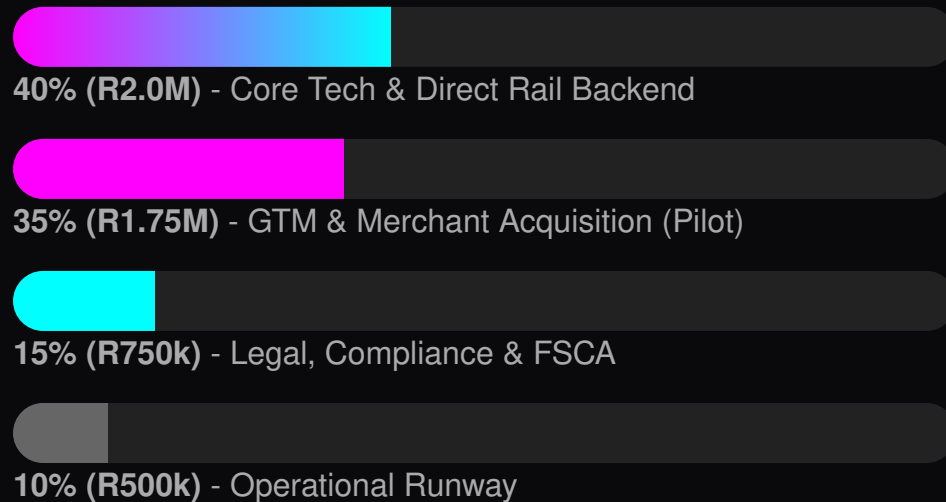

We outcompete incumbents on hardware accessibility, speed, and bottom-line cost.

Path to Profitability

Estimated Breakeven: Year 2

Our software-only model ensures extremely low overhead. We project reaching operational breakeven around **Month 24**.

This milestone is driven by aggressive local merchant onboarding and the compounding volume of instant, recurring transactions.
